DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-7, in the reply filed on August 9, 2004 is acknowledged.

Claim Objections

Claims 1 and 3 are objected to because of the following informalities:

In line 4, of claim 1, the word "bakcside" should read --backside--,

In line 9, of claim 1, the word "and" should read --or--, and

In line 3, of claim 3, the word "and" should read --or--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim) is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The

Art Unit: 3711

Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949). In the present instance, claim 5 recites the broad recitation 2 to 12mm, and also recites 4 to 10mm; claim 6 recites the broad recitation 4 to 22mm, and also recites 10 to 18mm; and claim 7 recites the broad recitation 10 to 25mm, and also recites 15 to 20mm, which is the narrower statement of the range/limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Heene et al. (USPN 6425831).

Regarding claim 1 and 3, Heene et al. discloses a golf club head comprising a recess having a polymer insert wherein the polymer insert is composed of a transparent polymer material with a thickness of 0.125 to 0.500 inches, or 3.175 to 127mm, and having a gloss and lustrous surface and wherein the recess being formed in the striking plate of a putter head and the insert is made of a thermoplastic polyurethane (See

Column 4, lines 13 through 38). The insert is transparent because polyurethane is inherently transparent.

Regarding claim 2, Heene et al. discloses the polymer insert having a pattern or logo inside the polymer insert (See Figure 10 and Column 6, lines 12 through 30).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Heene et al. (USPN 6425831).

Regarding claim 4, Applicant does not disclose why it is critical to use polymethyl methacrylate over any of the previously claimed materials. Furthermore, Heene et al. also disclose that the insert may be made of ionomer which is also inherently transparent. One having ordinary skill in the art would have found the selection of material to be an obvious matter of design choice. Any material, including the materials disclosed by Heene et al., would perform equally as well so long as the material is transparent.

Regarding claim 5-7, Applicant does not disclose why the location of the insert is critical in order to attain the invention. One having ordinary skill in the art would have found such to be an obvious matter of design choice. The location of the insert disclosed by Heene would perform equally as well because it facilitates placement of

Art Unit: 3711

logo for viewing. Furthermore, the club head of Heene can be an iron head or a wood (See Column 3, lines 53 through 58) and the insert has a thickness of 0.125 to 0.500 inches, or 3.175 to 127mm.
